## MDFLAM

MDF (Medium Density Fiberboard) is engineered board produced from resin bonded wood fibers under high pressure and heat. MDF is non-load-bearing product for interior use in dry conditions. Sanded to give a very fine surface, MDF is suitable for different coatings – veneering, laminating, painting and varnishing. Kronospan MDF can be used as a building material for a substitute for timber in non-load-bearing walls, ceilings, partitions etc.

## Particleboard P3

Particleboard P3 is non-load-bearing panel for use in dry and humid conditions with high dimensional stability and stiffness.

**kronospan** : Inspired by nature.

# MDF LAM

**MDF (Medium Density Fiberboard)** is engineered board produced from resin bonded wood fibers under high pressure and heat.

**MDF** is non-load-bearing product for interior use in dry conditions. Sanded to give a very fine surface, **MDF** is suitable for different coatings – veneering, laminating, painting and varnishing.

Kronospan **MDF** can be used as a building material for a substitute for timber in non-load-bearing walls, ceilings, partitions etc.
